```

Option 4 allows you to display or print a data set list so that you can ultimately view that data set's contents.

## Data Set

```
Menu RefList RefMode Utilities Help
Data Set List Utility
Option ==>
blank Display data set list P Print data set list
V Display VTOC information PV Print VTOC information
Enter one or both of the parameters below:
Dsname Level . . . MEUPAAA
Volume serial . . .
Data set list options
Initial View . . . 1
1. Volume Enter "/" to select option
2. Space / Confirm Data Set Delete
3. Attrib / Confirm Member Delete
4. Total
When the data set list is displayed, enter either:
"/" on the data set list command field for the command prompt pop-up,
an ISPF line command, the name of a TSO command, CLIST, or REXX exec, or
"=" to execute the previous command.
F1=Help F3=Exit F10=Actions F12=Cancel
SCR1 R4 C14 12
```

To obtain a Data Set List, leave the Option line blank, tab down to the Dsname Level, specify the User ID and Account information for the Data Sets you'd like to view and press Enter. Wildcard characters (\*, %) may also be used to narrow your search.

```
Data Set List Actions
Data Set: MEUPAAA
DSLIST Action
1. Edit 12. Compress
2. View 13. Free
3. Browse 14. Print Index
4. Member List 15. Reset

Once you've displayed a list of Data Sets, tab down to the one you'd like to view. At this point, you have many options. For a complete list of Data Set Actions (shown in the lower left corner), type a forward slash (/) on the Command column next to the Data Set Name. For descriptions or help on these options, press F1 which will also give you the short cut commands so that you don't have to go through the menu process each time. In this instance, we've selected 'Browse' to review the report shown below.

A Standard Report contains 132 characters which is larger than the average size 80 character report. To accommodate this, use your Function Keys. They are initially set as follows: F7 to Scroll Up, F8 to Scroll Down, F10 to Scroll Left and F11 to Scroll Right. Remember, you can review your Function Key settings by typing **Keys** on the Command line and pressing Enter.
